GITHUB COPILOT

Copilot suggests functions, explains code, and autocompletes in real time. It's like a coding partner who never gets tired. It keeps you focused in your IDE and speeds up delivery.

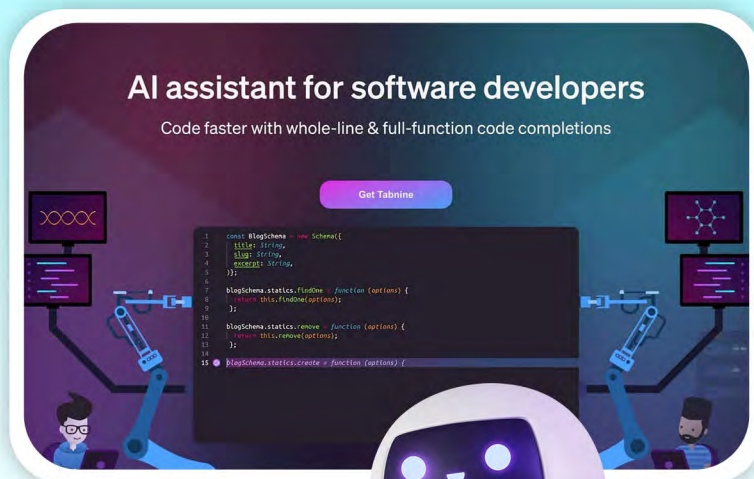

[Try GitHub Copilot](#)

YOUR CODING SIDEKICK THAT'S ALWAYS READY WITH A SMART SUGGESTION.

AMAZON CODEWHISPERER

CodeWhisperer is Amazon's coding partner for all things AWS. It writes code for services like Lambda and S3, saving you from digging through docs.

Start with CodeWhisperer

TABNINE

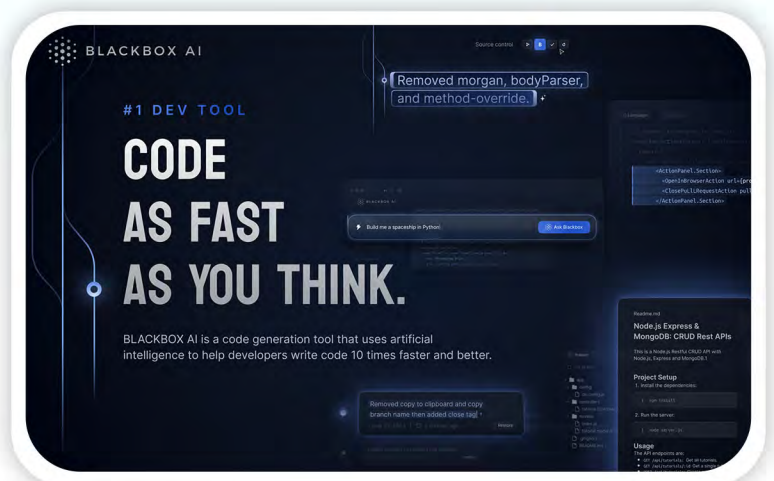

Tabnine finishes your sentences in code. It learns your style, predicts your next line, and supports 20+ languages to keep you in flow.

Boost with Tabnine

BLACKBOX AI

Blackbox AI works everywhere: IDEs, browsers, you name it. It suggests, searches, and generates snippets on demand.

Try Blackbox

**WRITING FASTER IS GREAT, BUT PROTECTING
YOUR CODE IS EVEN BETTER.**

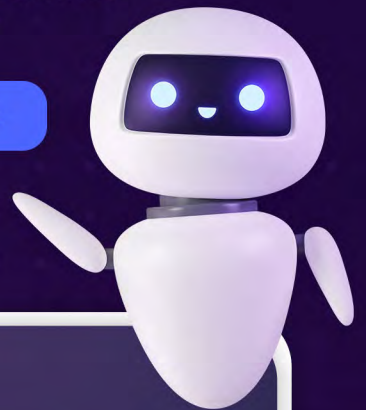

Develop Fast.
Stay Secure.

snyk

SNYK

Think of Snyk as your security guard. It scans your code and dependencies for vulnerabilities before they sneak into production.

Secure with Snyk

REPLIT GHOSTWRITER

Ghostwriter lives inside Replit and helps you code, debug, and learn in real time. Perfect for beginners and pros who need quick prototypes.

Use Ghostwriter Now

Ghostwriter

Write better code, faster, with
Replit's web-based coding AI.

 **replit**

POLYCODER

PolyCoder is an open-source AI model built for coding. Transparent, customizable, and private — ideal if you want total control.

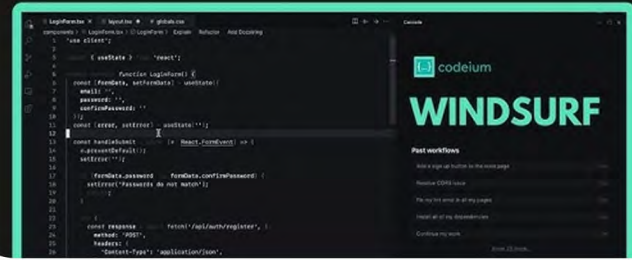

Explore PolyCoder

WINDSURF (BY CODEIUM)

Windsurf is an AI-powered IDE built on Codeium tech. It offers fast autocomplete, smart suggestions, and multi-language support, all built right into your editor.

THIS IDE BUILT THE **ENTIRE APP**

LANGCHAIN

LangChain connects AI models, APIs, and data into workflows. It's how developers are building smarter, custom AI applications.

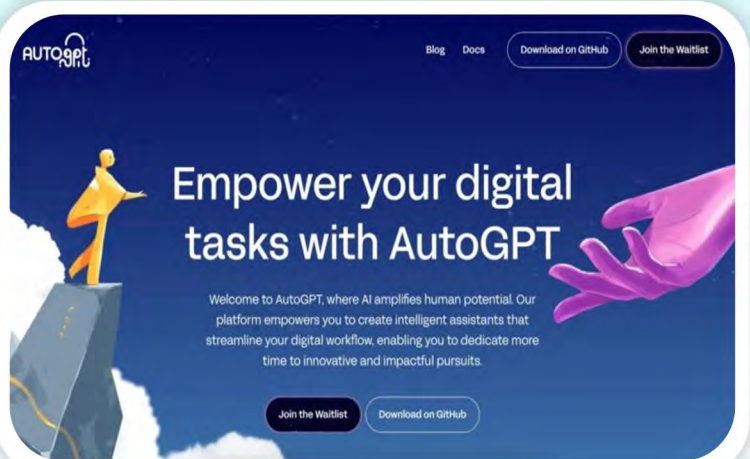

[Build with LangChain](#)

AUTOGPT

AutoGPT takes your goal and figures out the steps to get it done — then executes them on its own. It's like giving your AI a to-do list and watching it run.
