

PROMPT-DRIVEN TOOLS THAT UNLOCK AI'S FULL POTENTIAL

Today's most powerful AI tools don't just run on clicks, they run on prompts. Whether you're writing, coding, designing, or creating, it's the quality of your prompt that shapes the result. This toolkit features tools that respond best when you know how to ask. Master the prompt, and you master the output.

PIKA AI

Turn a simple prompt into a high-quality video using Pika's AI video generation engine. It understands motion, cinematic framing, and visual storytelling.

[Create Video with Pika](#)

Prompt Tip: Start with a visual scene + camera angle: "A slow zoom-in on a neon-lit alleyway, cinematic lighting."

THINK OF YOUR PROMPT AS YOUR INSTRUCTIONS. BE CLEAR AND BOLD.

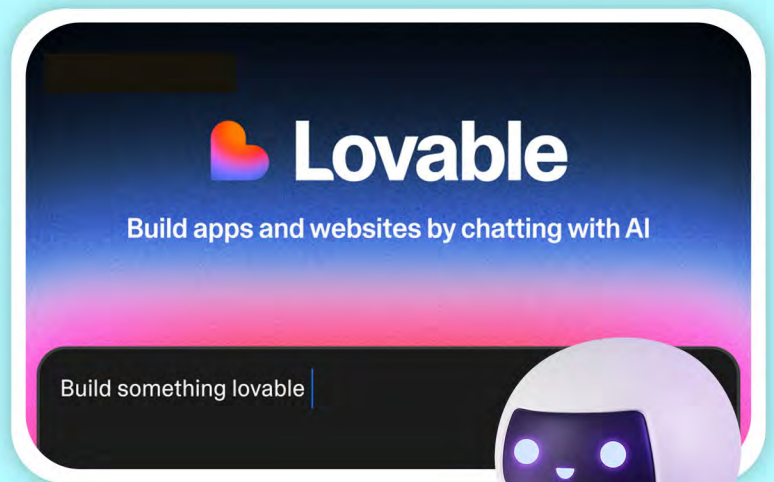

LOVABLE

This branding AI creates names, slogans, tone-of-voice guides, and even mockups — all prompt-driven. It's quirky, fun, and lightning-fast.

Build Your Brand with Lovable

Prompt Tip: Describe the vibe you want: "A warm, nostalgic coffee brand with a retro diner feel."

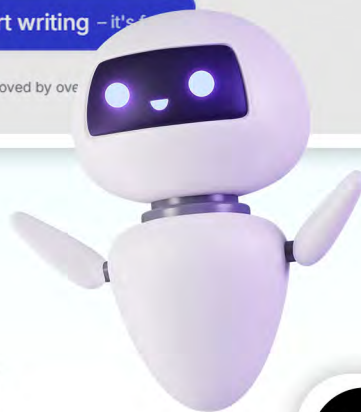

Meet Your Intelligent Research Assistant

The AI-powered workspace to help you read, write, and organize research with ease.

JENNI AI

A writing assistant that helps you co-write blog posts, essays, and stories in real time using smart, contextual suggestions.

Write Smarter with Jenni

Prompt Tip: Give it structure: "Write a 3-paragraph blog intro on how AI helps small businesses save time."

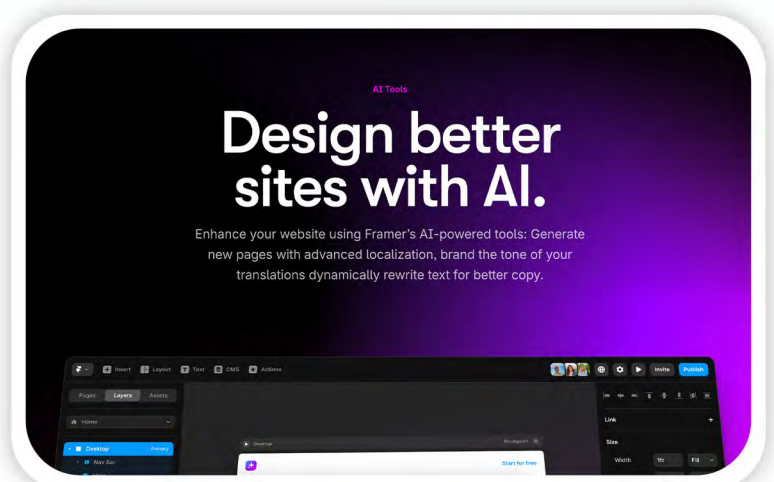

FRAMER AI

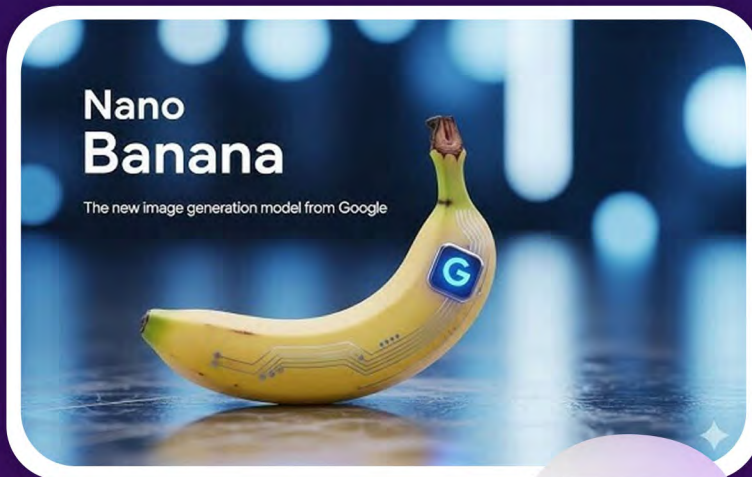

Generate full website designs from a single sentence. Just describe what you want, and Framer creates responsive, ready-to-edit layouts.

Try Framer AI

Prompt Tip: Start with audience + purpose: "A bold landing page for a productivity app targeting remote teams."

NANO BANANA

A fun tool for building games and interactive experiences using text prompts. It's still emerging but full of playful, creative energy.

[Play with Prompts](#)

Prompt Tip: Get specific: "A 2D platformer where a cat collects stars in space with low gravity physics."

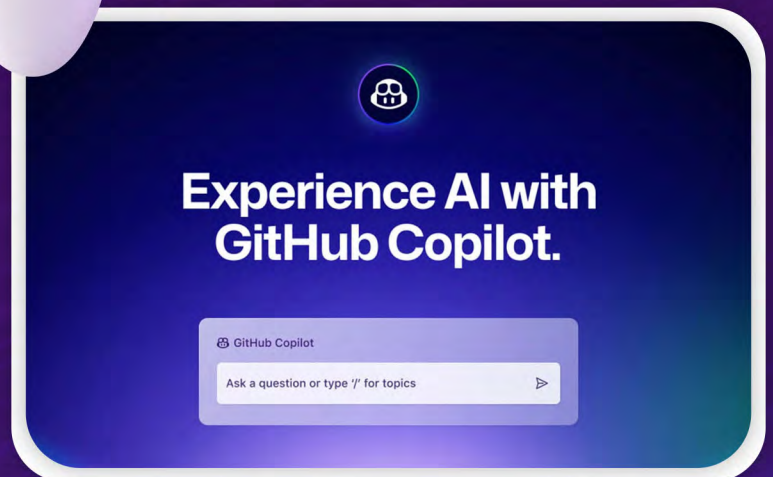

GITHUB COPILOT

Your in-editor AI coding partner that suggests full lines, functions, and even builds apps based on your prompts.

[Code Faster with GitHub](#)

Prompt Tip: Be task-focused: "Build a responsive navbar using Tailwind CSS with dropdowns."

PROMPTING IS THE NEW LITERACY

These tools are smart but only if you speak their language.
Start small, be specific, and iterate.
